

## COMMUNITY HEALTH NEEDS ASSESSMENT

### TOP HEALTH PRIORITIES

- 1 Access to healthcare
- 2 Access to dental health services
- 3 Access to mental health services

## COLLABORATION EXAMPLE

"CHA/CHNA was a collaborative effort between the Geary Community Hospital, Geary County Health Department, Konza Prairie Community Health and Dental Center (Konza) and Geary County Unified School District # 475. Konza's CEO, Lee Wolf; and Konza's Board Member, Florence Whitebread both participated on the Advisory Committee."

## CARE COORDINATION & PATIENT-CENTERED MEDICAL CARE

"Konza continues to provide high quality, comprehensive health care (that includes dental and mental health services) to the medically underserved population of Geary County and the surrounding area through care coordination and collaboration with other providers to maximize resources. This has occurred even during the renovation/expansion (funded by Federal Capital Development funds) of Konza's main clinic located at 361 Grant Avenue in Junction City."

## ADDRESSING COMMUNITY HEALTH PRIORITIES

"To increase awareness of healthcare services available, Konza now creates and distributes newsletters highlighting services and resources available within the community. These newsletters are handed out at the clinics, community coalition meetings, health fairs, etc. to increase awareness of services offered. "

## COMMUNITY PARTNERSHIPS

**HOSPITAL** "clinic providers given admitting privileges...access to patients' EMR...ability to collaborate on treatment/care..."

**HEALTH DEPARTMENT** "work collaboratively...refer for WIC, prenatal services, and mother and infant services..."

**MENTAL HEALTH CENTER** "collaborative relationships"

**PRIVATE PRACTICES** "collaborations with specialists and dental providers...client referrals...substance abuse services..."

**OTHER** "faith-based groups, schools, private businesses, and non-profit organizations"

## USING GRANT FUNDS TO IMPROVE PATIENT CARE

"Community Based Primary Care Clinic (CBPC) funds are extremely important and are a critical component that enhances Konza's ability to provide high quality, comprehensive health care (that includes dental and mental health services) to the medically underserved population of Geary County and the surrounding area (including Riley County). CBPC funds will be used for salary support for 2 Nurse practitioners, 1 Radiology Technician and 1 RN for the immunizations clinic as indicated on the attached budget justification spreadsheet."
